2. Click Get Started Now and complete the form. We simply need to identify you as an eligible member.
3. Check your email to confirm your membership

OmniSure will verify your eligibility and grant you access to RiskFit®

RiskFit® Benefits

- OmniSure's confidential, third-party RiskFit® Helpline for compliance, risk, or as-it-happens best practice and adverse event support. Sometimes you need that outside consultant to talk things through with, someone not emotionally involved in the current decision process, to help you gain clarity and insight on the matters at hand. Our experienced team of risk consultants is here to help. Whether it is talking through a situation, new risk exposure or, you are considering updating/changing a policy, we are here to be of support. And, rather than you digging through yet another database, let us search for you to find the applicable standards, sample policies, or supporting literature you need!
- Risk Tips via email (videos, podcasts, toolkits, and more). Let us know the team members you would like added to our email list (name and email address), and we will do the rest!
- Risk Fitness® online programs to chart the course for results. Creating a login allows your frontline managers, members of the risk team, or anyone else you authorize, the opportunity to spend about an hour of their time reviewing core risk principles and earn a certificate. Again, let us know whom you would like to grant access to these resources, and we will do the rest.
- RiskFit® Certificates for those who complete the do-it-yourself Risk Fitness® program.

Notting Hill Risk Management, LLC and OmniSure bring our members the best possible combination of specialized coverages and risk management support. We're here for you every step of the way!

Brought to you by

Member Risk Management Services

Members of the Notting Hill Risk Retention Group can rest assured that they and their colleagues have access to 24/7 clinical risk management support to help manage potential liability issues as they arise. Notting Hill Risk Management, LLC has partnered with OmniSure Consulting Group, a highly specialized risk control firm, to help you improve patient and resident safety, regulatory outcomes, and overall performance. All members receive RiskFit[®] Essentials as well as one of the various types of Risk Assessments. OmniSure's seasoned clinical risk consultants with deep setting-specific expertise specialize in rooting out pertinent information and supporting clients with recommendations to reduce risk and avoid losses.

RiskFit[®] Essentials

No matter the size or setting, every member deserves the opportunity to reduce risk, improve performance, and get advice. OmniSure's Helpline for advice-on-demand is answered live, 24 hours a day, 7 days a week. RiskFit[®] Essentials online programs take members through a do-it-yourself assessment process, ultimately resulting in a RiskFit[®] Certificate and the opportunity to download risk-specific tools and resources. Monthly RiskTips by email that include videos, podcasts, and checklists.

TeleRisk[™] Consultation

The TeleRisk[™] Consultation starts with a review of available external information, including the application, loss runs, survey history, website, online reviews, and other data, followed by a telephonic interview and best practices consultation, which can reveal a lot about risk exposures and opportunities for improvement. The TeleRisk[™] Consultation results in a report with recommendations for the member and automatically comes with RiskFit[®] Essentials for support throughout the policy period.

OffSight[™] Risk Assessment

The OffSight[™] Risk Assessment goes into significantly greater detail than the stand-alone TeleRisk[™] Consultation to identify risks, starting with infection control, and provides clients with an in-depth list of recommendations. Using a combination of interviews and offsite reviews of policies, procedures, and facility practices, the consultant reports on risks, giving members client-specific recommendations. The clinical risk specialist also engages in a video tour of the facility.

Comprehensive OnSight[®] Risk Assessment

The Comprehensive OnSight[®] Risk Assessment is perfect for those who are truly serious about managing risk. Our seasoned clinical risk consultants with setting-specific expertise will not only go deep to identify and address risks during the full-day detailed onsite inspection, but they will also consult along the way, resulting in the best possible recommendations and prioritized action plan to avoid claims and prevent lawsuits. RiskFit[®] Essentials is also included, of course!
